**The Improved Design of VOLUME BINDERS**

now available to readers of *Traffic Engineering + Control* securely and conveniently retains a year's copies not by metal rods, but by bonded nylon cords of great strength and durability—these can be stretched 3–4 inches from the spine to allow the easy insertion or removal of individual issues.

Each binder—covered in red Balacron PVC-coated board, and with the journal's name in gold foil on the spine—is supplied with a gold-foil, self-adhesive abbreviation of the Volume Number and Calendar Year—e.g. 24–83 for Vol. 24, 1983; 25–84 for Vol. 25, 1984; and so on—which is easily affixed to a special panel on the spine. *It is essential that, when ordering, you specify the Calendar Year required.*

The binders cost £3.00 ($6.00) each, inclusive of inland/overseas postage, giving readers the opportunity to shelve their year's copies of *Traffic Engineering + Control* neatly and at the very reasonable cost of about 25 pence or 50 cents an issue. Send your instructions (remembering to specify a Calendar Year, and enclosing payment if possible) to

Printerhall Ltd, 29 Newman Street, London W1P 3PE

**This publication is available in microform.**

University Microfilms International reproduces this publication in microform: microfiche and 16mm or 35mm film.
